## Examples of COST Actions

**40 000 researchers are involved in over 200 COST Actions**

Field	Example of COST Action
ICT	Optical Wireless communications
ESSEM	Harmonizing global biodiversity modelling
BMBS	Next generation sequencing data analysis network
CMST	New drugs for neglected diseases
FA	Feed for Health
FPS	Forest Management Decision Support System
TUD	Smart Low Carbon Regions
MPNS	Towards functional sub-wavelength photonics structures
ISCH	The role of the EU in UN Human Rights Reform

ESSEM (Earth Systems Science and Environmental Management)

BMBS (Biomedicine and Molecular Biosciences)

CMST (Chemistry and Molecular Sciences and Technologies)      FA (Food and Agriculture)

FPS (Forests, their Products and Services)

TUD (Transport and Urban Development)

MPNS (Materials, Physics and NanoSciences)

ISCH (Individuals, Societies, Cultures and Health)

## COST Actions

COST does not itself fund research, but supports networking activities such as meetings, conferences, short-term scientific exchanges and outreach activities. It receives financial support for its coordinating activities.

Proposals playing a precursor role for other European programmes and/or initiated by early-stage researchers are especially welcome.

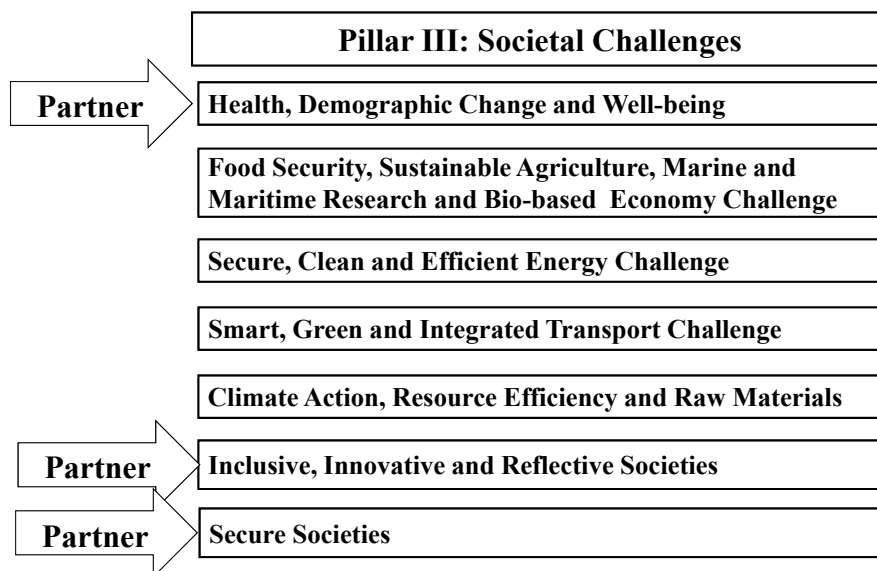

COST (European Cooperation in the field of Scientific and Technical Research) is organised in nine broad domains (biomedicine and molecular biosciences; chemistry and molecular sciences and technologies; earth system science and environmental management; food and agriculture; forests, their products and services; individuals, society, culture and health; information and communication technologies; materials, physical and nanosciences; transport and urban development).

Proposers are invited to locate their topic within one domain. However, inter-disciplinary proposals not fitting readily into a single domain are particularly welcome and will be assessed separately.

COST funds 60 Actions per year that run for 4 years. Average contribution = €100,000

How to Write a Competitive Proposal for Horizon 2020

[www.hyperion.ie/h2020-proposalcourse.htm](http://www.hyperion.ie/h2020-proposalcourse.htm)

## 1 TOPIC

The work of civil society organisations fits into [Societal Challenge 6](#) on *Europe in a changing world - Inclusive, innovative and reflective societies*, within Pillar III of Horizon 2020. The not-for-profit sector also fits into the other Pillar III societal challenges, such as: health, demographic change and wellbeing; food security, agriculture and forestry, marine and maritime and inland water research, and the bioeconomy; energy; transport; climate action, environment, resource efficiency and raw materials; and secure societies.

## 2 Who wrote the topic?

In the proposal course, ‘5 Key Questions’ were introduced. These questions must be answered in the Summary. At the beginning of the proposal (Section B1.3) the ‘big picture’ and ‘stakeholder diagram’ must be presented. These documents will help the researcher understand what is required in this topic.
